ENVIRONMENT

- Our overall vision is to limit the impact of climate change.
- The Green Party believes that with its political leadership, NI can be a carbon-low environment.
- We support an independent Environmental Protection Agency for Northern Ireland to protect our environment, free from political agendas. In addition, an independent EPA will help prevent EU fines.
- The Green Party supports severe financial penalties for those found guilty of pollution.
- The Green Party will support improvements to our coastal defences, particularly in areas which will be vulnerable to flooding as sea levels rise.
